

Questions:

1. Implement greedy algorithm for currency exchange. Show the output for at least 5 test cases with different n and denominations. There should be at least one example which demonstrates greedy algorithm does not provide optimal solution.
2. Implement the greedy algorithm for Task Scheduling algorithm. What is the time taken for the recursive algorithm ?
3. Solve the following leetcode problems:
 - i. Problem 55. Jump Game
 - ii. Problem 455. Assign Cookies
 - iii. Problem 881. Boats to Save People [https](https://leetcode.com/problems/boats-to-save-people/)
